

SANT KUMAR SAHU (VYOM)

Aspiring Data Analyst Intern & Automation Specialist

Chandigarh, India (Open to Remote)

7355698848 | sahuvyom7@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Data Analyst Intern with strong expertise in SQL queries, Python, Power BI, and workflow automation. Proficient in building end-to-end data pipelines, interactive dashboards, and delivering business insights. Built 5 live projects and deployed real-time Telegram + WhatsApp automations for a live ed-tech company. Analytical thinker with good problem-solving and quick learning ability.

SKILLS

Languages & Querying Python, SQL Queries (CTEs, Window Functions, Subqueries, Joins)

Libraries & Analysis Pandas, NumPy, Matplotlib, Exploratory Data Analysis

BI & Visualization Power BI (DAX, Data Modeling, Dashboards, Slicers), Excel

Automation n8n (Workflows, JSON Integrations), Pyrogram (Telegram Bots), Process Automation

Tools MySQL Workbench, Google Colab, Git/GitHub, DigitalOcean

EXPERIENCE

Freelance Automation Developer — UpliftJEE May 2026 – Present

- Designed and deployed Telegram automation bot using Pyrogram for real-time student query handling.
- Built n8n-based WhatsApp automation workflows for multi-channel notifications and intelligent query routing.
- Owned full architecture, DigitalOcean deployment, and maintenance ensuring 24/7 production reliability.
- Delivered measurable efficiency gains by automating repetitive processes.

PROJECTS

Food Delivery Business Analysis (Python · MySQL · Power BI) [Live](#) | [GitHub](#) Analyzed 1,500+ orders and delivered business insights on refund rates using advanced SQL queries and interactive dashboards.

E-Commerce User Conversion Analysis (Python · Pandas · Matplotlib) [Live](#) | [GitHub](#) Uncovered key business insights on user behavior and conversion funnel.

Retail Sales Dashboard (Power BI · DAX) Interactive dashboard analyzing sales, profit, and trends across 8 Indian cities with custom KPIs and slicers.

HR & Payroll SQL Analysis (MySQL) Designed relational database and solved 10 complex queries.

Superstore Sales Analysis (Python · Pandas) Identified profitable vs loss-making cities through detailed revenue-profit analysis.

CERTIFICATIONS

- **HackerRank SQL Advanced** [View Certificate](#)

EDUCATION
